Ralph Barnes, VP & Engineering Manager: rbarnes@ontario-plastics.com

Why OP-NY? Because we:

- Bend over backwards to meet your needs
- Have the experience you need to make your project a success
- Pride ourselves on our processes, tools and methodologies
- Have a team-based culture of continuous improvement
- Care about meeting your requirements today and tomorrow
- Are here behind the scenes to serve you in the most effective manner possible

General Information

- Founded 1945 (privately held)
- Plant: 30,000 Sq. Ft. Warehouse: 15,000 Sq. Ft.
- 20 - Injection molding presses ranging from 40 tons (1 oz. shot size) to 500 tons (60 oz. shot size)
- 1 - 30 Ton Vertical machine.
- Secondary machines and Equipment.
- **Registrations:** ISO 9001:2015 #US017175 | UL Compliant | ITAR Registered
- DUNS: 00-220-4964 | CAGE: 37SG4

Core Competencies/Processes

Consulting | Design & Engineering | Early Supplier Involvement | Reverse Engineering | Tool Transfers
Rapid Prototypes | Mold Building | Material Selection | Metal to Plastic Conversions | Injection Molding
Insert Molding | Over Molding | Decorating | Assembly | Machining | Packaging | Sourcing
Inventory Management | Project Management

- Significant in-house aluminum molding expertise
- Thorough inspections of every mold transferred to our facility for quality – followed by sample runs until the finished part meets your approval
- A robust ERP system to ensure efficiency, inventory management and enhanced communication
- Twenty Four Hour Operation to run small, medium and large volume projects
- Mold over 500 different grades of resins and will analyze/select the right plastics for you

Markets We Serve

Aerospace | Automotive | Agriculture | Consumer Products | Cutlery | Defense/Military | Electronics
Insulators | Electronic Enclosures | Firearms | Government | Home & Garden | Labware |
Medical Imaging | Office Products | Packaging | Photographic | Power Hand Tools

*flexible solutions for your rigid requirements
we've got it under control*
